## 1. Qualitative Information Concerning Quarter Financial Results

### (1) Explanation of Operating Results

During the consolidated cumulative period of 1Q, the Japanese economy experienced a gradual economic recovery continued against the background of a pickup in production and capital investment, as well as relatively steady public investment, while stagnation in recovery of personal consumption and export is observed. Looking ahead, a gradual recovery is expected to continue under an improving employment and income environments, including expectation for increase in real wages. On the other hand, in addition to such overseas factors as potential outcomes of the upcoming U.S. presidential election, increasing tensions in the Middle East and Ukraine, concerns over the prospects for the Chinese economy, and ongoing high interest rate level in Europe and the U.S., attention will need to be paid to increases in an acceleration in price increase in Japan due to the weak yen and such issues.

Society's demand for security services for safety and reassurance is rising amid various developments, placing greater expectation on our Group to provide total services including security. These developments are driven by cyber-attacks on critical public infrastructure and supply chains, concerns about the safety and security of the elderly, women, children and other socially vulnerable groups, increases in violent street crimes and traffic accidents, changes in the security situation brought about by natural disasters such as the January 2024 Noto Peninsula Earthquake, and the aging of public infrastructure. In addition, the number of criminal offenses in 2022 has increased year-on-year for the first time since 2002, and is strongly expected to increase further in the subsequent years. Furthermore, the sense of security in Japan has been worsening due to an outbreak of the theft of copper wires at solar power generation facilities and crime activities by foreigners. It may be said that the role of the Group in providing safety and security has been increasing.

Under these circumstances, ALSOK Group has continued to provide appropriate services as a business operator that provides services related to social safety and security (Security Services, Facility Management Services etc., Long-term Care services, and Overseas Services) with the aim to contribute to sustainable societies. As stated in “Grand Design 2025,” our medium-term management plan, we aim to be a safety and security service provider who persistently aims to serve the society's various needs for greater safety and security. To meet the expanding safety and security needs of our customers and society amid diversifying risks, we are working to provide new services that combine a variety of service functions, including security, facility management and long-term care.

As a result of these ongoing initiatives, the Group's consolidated results for the current fiscal year improved with net sales increased 6.1% year on year to 129,011 million yen. However, due to implementation of wage raise and increased bonus as well as additional costs related to the end of 3G transmission, operating income decreased 16.0% year on year to 7,094 million yen, ordinary income decreased 13.6% year on year to 7,724 million yen, and net income attributable to owners of the parent decreased 17.0% year on year to 4,168 million yen.

By business segment, the figures achieved are as follows. Please note that, from this consolidated accounting period of 1Q, the reportable segments are modified from traditional “Security Services,” “General Property Management and Fire Protection Services,” and “Long-Term Care Services” to “Security Services,” “Facility Management Services etc.,” “Long-Term Care Services” and “Overseas Services.” As a result, YoY of each segment is calculated by applying the year on year values to the modified reportable segment classifications.

Sales in the Security Services segment increased 2.0% year on year to ¥94,107 million, while operating income decreased 15.1% year on year to ¥7,989 million.

In the Electronic Security Services, we will promote sales of ALSOK-G7 (G7) as a service for corporate customers, contributing to customer needs to reduce labor costs. It is equipped with live image confirmation as a standard feature and presents a full range of options for image storage and remote access. Its scope of application will be further expanded according to the customer needs in the future. We expanded the service areas of “ALSOK IT Rescue” and “ALSOK Facility Rescue” services to all over Japan. These services utilize ALSOK's existing infrastructure for electronic guarding. In the event of a failure with IT equipment or a building's facilities, guards will quickly head to the location to investigate causes and take emergency measures with the operational support of specialists. Also, in addition to the Website Tampering Detection and Recovery Service launched in October last year, we provide our existing inspection services for panels of solar power facilities and expand this business to include inspections and surveys of various facilities using drones.

For HOME ALSOK Services, we experienced a growth in orders due to sales increase of “HOME ALSOK Connect” launched in April last year. These products provide our various customers with safety and security amidst a deteriorating sense of security. In addition to the conventional Online Security Service, in which ALSOK rushes to the scene of an emergency, this product offers a less expensive self-security plan with optional on-site confirmation by ALSOK at the request of the customer. Customers of self-security can upgrade to the Online Security Service at any time. In this May, we launched “Sumaho Gate,” a controller for “HOME ALSOK Connect” equipped with a functionality to prevent the smartphone from being lost, which

empowers the users to start/stop the security activities with smooth authentication using smartphones. We are also actively promoting sales of HOME ALSOK MIMAMORI SUPPORT, a monitoring service for elderly individuals.

In the areas of Stationed Security Services, we have provided security services at airport facilities that reopened thanks to recovery of inbound demand. We have been responding to security needs thanks to recovery at production sites in Japan and thanks to the full-scale resumption of events inside Japan following the COVID-19 pandemic. For Expo 2025 Osaka, Kansai Japan related business, we won several orders, such as security at pavilions and other buildings, and the entire group will support this business engagement. In addition, we will focus further on manpower-saving and improvements in efficiency of stationed security through digital transformations and the like.

In the Transportation Security Services, while the number of ATMs is declining due to the consolidation and closing of branches of financial institutions, the demand for more efficient cash management operations is still strong and we are expanding sales of ATM general management services and cash deposit and dispenser machine on-line systems. We also offer a series of Tax Payment Receipt Systems, which automate counter services provided at satellite offices of municipal governments by utilizing our cash deposit and dispenser machine on-line systems. We will also promote replacement, etc. of equipment for new banknotes issued in this July. We will continue to gain an understanding of various outsourcing needs such as improving operational efficiency and reducing costs at regional financial institutions and expand our service offerings.

Sales in the Facility Management Services etc. segment increased 1.3% year on year to ¥15,361 million with a steady growth in contract proceeds, while operating income increased 6.3% year on year to ¥1,268 million. We will continue working to expand our Facility Management operations while also selling, installing, and providing maintenance for EV charging facilities as part of our work to strengthen our efforts at sustainability.

Sales in the Long-Term Care Services segment increased 3.9% year on year to ¥13,031 million, while operating income increased 15.8% year on year to ¥377 million, thanks to performance contribution from new facilities opened in the previous period. We will continue to develop and improve the efficiency of our long-term care service operations through the use of robots and DX to support nursing care and work while working to expand services under the unified “ALSOK’s Care” Long-Term Care Services brand.

Sales in the Overseas Services segment increased 302.1% year on year to ¥6,511 million, thanks to the M&A effects, while operating loss was ¥182 million (¥178 million operating loss year on year). Based on the expertise we have cultivated in Japan, we will continue to offer products and services optimized for individual countries, and we will aggressively expand our operations to support the overseas businesses of our customers.

The Group will continue to aptly meet the expanding safety and security needs of society by continuing to utilize new technologies and improve productivity, while fulfilling our responsibilities as a provider of services related to the safety and security of society.

## (2) Explanation of the Financial Position

With regards to the total assets as of the end of the consolidated accounting period of 1Q, there was a decrease of ¥4,990 million year on year, to a total of ¥566,472 million.

This is a result of the following factors: other current assets such as prepaid expenses increased ¥9,454 million and cash and deposits increased ¥3,129 million, while notes, accounts receivable-trade, and contract assets decreased ¥9,180 million, and cash for transportation security services decreased ¥7,999 million.

Total liabilities increased ¥4,989 million year on year to ¥198,698 million. This is a result of the following factors: “Other” current liabilities such as deposits received increased ¥8,822 million and short-term loans payable increased ¥7,073 million, while notes and accounts payable decreased ¥7,075 million and income taxes payable decreased ¥2,783 million.

The status of cash flows is as follows.

(Net cash provided by (used in) operating activities)

During the consolidated cumulative period of 1Q, net cash provided by operating activities amounted to ¥16,412 million, 10.3% less than the same quarter of the preceding fiscal year. This is a combined result of the following factors: an increase of ¥9,317 million due to decrease in notes and accounts receivable, an increase of ¥8,289 million due to decrease (increase) in assets and liabilities for Transportation Security Services, an increase of ¥7,514 million due to the quarterly income before income taxes, and an increase of ¥4,895 million due to decrease in internal reserves due to depreciation and amortization, as well as a decrease of ¥7,074 million due to the decrease in notes and accounts payable and a decrease of ¥5,181 million due to corporate income and other related payments.

The decrease(increase) in assets and liabilities for Transportation Security Services reflects changes in the amounts of funds procured for Transportation Security Services, which are part of “the cash and short-term loans payable for Transportation Security Services”.

(Net cash provided by (used in) investing activities)

During the consolidated cumulative period of 1Q, net cash provided by investment activities amounted to ¥4,217 million, 129.2% more than the same of the preceding fiscal year. This is a result of the decrease of ¥3,558 million due to acquisition of properties, plants and equipment.

(Net cash provided by (used in) financing activities)

During the consolidated cumulative period of 1Q, net cash provided by financing activities amounted to ¥9,208 million, 132.4% more than the same of the preceding fiscal year. This is a combined result of the following factors: while an increase in short-term loans payable resulted in an increase of ¥7,076 million, there were decreases of ¥7,511 million due to payment of cash dividends, of ¥6,482 million due to purchase of treasury stocks, and of ¥1,480 million due to repayment of lease obligations.

(3) Explanation of Future Forecasts such as Forecasted Consolidated Financial Results

With regards to the forecasted consolidated financial results of the fiscal year ending March 2025, there have not been any changes from the forecasts published on May 14, 2024.

(4) Notes on the Preparation of Quarterly Consolidated Financial Results

(Changes in accounting policies)

(Application of “Accounting Standard for Current Income Taxes” and other standards)

“Accounting Standard for Current Income Taxes” (ASBJ Statement No. 27, October 28, 2022. Hereinafter, “Revised Implementation Guidance 2022”) and other standards have been applied since the beginning of the consolidated accounting period of Q1.

For revisions related to calculation classification of income taxes (taxes for other comprehensive income), items are treated according to the transitional treatment stipulated in the proviso of Paragraph 20-3 in Revised Accounting Standards 2022 and the transitional treatment stipulated in the proviso of Paragraph 65-2 (2) in “Implementation Guidance on Tax Effect Accounting” (ASBJ Guidance No. 28, October 28, 2022. Hereinafter, “Revised Implementation Guidance 2022.”) There is no effect due to this on the quarterly consolidated financial statements.

For revisions related to review of treatment of the consolidated financial statements to hold over the loss (gain) on sales of subsidiary shares between consolidated companies from a taxation point of view, Revised Implementation Guidance 2022 has been applied since the beginning of the consolidated accounting period of 1Q. These changes in accounting policies will be retroactively applied, and are applied to the quarterly consolidated financial statements and consolidated financial statements in the quarters in the previous year and previous consolidated fiscal year. There is no effect due to this on the quarterly consolidated financial statements or consolidated financial statement in the previous consolidated fiscal year.

(Notes on Considerable Changes to Amount of Shareholders' Equity)

The Company, per a resolution at the Board of Directors meeting held on May 14, 2024, had acquired 6,895,900 shares of treasury stock (amount: ¥6,482 million) up to June 30. As a result, the number and amount of treasury stock at the end of consolidated cumulative period of 1Q (from April 1, 2024 to June 30, 2024) were 16,468,268 shares and ¥12,556 million, including the portion acquired through requests for purchase of odd-lot shares and changes in the number of shares corresponding to the Company's ownership in affiliates.

(Application of Specific Accounting Processing for Creation of Quarterly Consolidated Financial Statement)

With regards to tax expenditures, a reasonable estimate was made of the effective tax rate following application of tax effect accounting on the income before taxes of the year under review, which includes the consolidated accounting period of 1Q, to make a calculation by multiplying the income before taxes by the estimated effective tax rate.

Note that deferred tax expenses are included in the income taxes.
