2. Management analysis of financial position, operating results and cash flows

Any forward looking information included in this report is based on the best estimates of the Company as of the date of filing of this report.

(1) Financial position and operating results

During the three months ended June 30, 2023, the COVID-19 was reclassified as "Class 5" infectious disease under the Infectious Disease Control Law, and the pandemic almost came to an end in Japan. As a result, we saw a gradual recovery of the Japanese economy continued as social and economic activities returned to pre-pandemic levels and the number of foreign visitors to Japan recovered. Looking forward, although moderate private-sector demand-led growth is expected, attention should be paid to developments in the international and domestic situations, including global inflationary trends, sharp fluctuations in foreign exchange and financial markets, financial systemic risk, and downside risk of economies of China, Europe and the United States. As stated in the government's 2022 strategy to make Japan "the World's Safest Country," society's expectations for the security sector are rising amid various developments, placing expectations on the Group to provide total services including security, facilities, and long-term care. These developments include a declining birthrate, aging population and a shrinking workforce, cyber-attacks on critical infrastructure and supply chains, concerns about the safety and security of the senior citizens, women, children and other socially vulnerable groups, increasing violent street crime and accidents, natural disasters, and aging infrastructure. In addition, the number of criminal offenses in 2022 increased year-on-year for the first time since 2002, and is likely to increase in the first half of 2023. With the deterioration of the domestic sense of security following the attack on the Prime Minister and the wide-area robbery and assault case, the Group's role to protect safety and security is growing.

In this environment, the Group has continued to provide appropriate services as an operator of service businesses related to the safety and security of society (the Security Services, General Property Management and Fire Protection Services, and lifestyle support services such as Long-Term Care Services), which are all indispensable for ensuring the stability of the lives of the people and the national economy. As set forth in the Medium-Term Management Plan "Grand Design 2025", the Group aims to become "a resilient integrated safety and security solutions provider that meets various safety and security needs of society". In order to respond to increasing safety and security needs of customers with diversified risks, we have made efforts to provide new services that combine a variety of services including security, facility management and long-term care.

As a result of the above, the Group's operating results for the three months ended June 30, 2023 showed a significant improvement compared to the previous period, and were even stronger compared to the pre-pandemic first quarters of the fiscal years ended March 31, 2019 and 2020. The Group recorded the net sales of \(\frac{\pmathbf{1}}{121}\),593 million (6.7% increase year on year), operating income of \(\frac{\pmathbf{8}}{8}\),699 million (21.1% increase year on year), ordinary income of \(\frac{\pmathbf{9}}{9}\),193 million (16.7% increase year on year), and profit attributable to owners of parent of \(\frac{\pmathbf{5}}{5}\),195 million (16.6% increase year on year) for the three months ended June 30, 2023.

The operating results for each segment are described below. During the three months ended June 30, 2023, reportable segments and the allocation method of certain income and expenses were changed. For comparison purposes, the figures for the three months ended June 30, 2022 have been reclassified based on the revised classification and allocation method.

The net sales of the Security Services segment was \$92,370 million (3.5% increase year on year), and operating income was \$9,210 million (15.8% increase year on year).

The Company has provided services for corporate customers through its Electronic Security Services business and promoted sales of ALSOK-G7 (read as "ALSOK G-seven"), which contributes to customers' manpower saving needs. ALSOK-G7 is equipped with live video monitoring as a standard feature, enhanced optional services such as remote monitoring using stored and live images as well as remote equipment control. Going forward, we will further expand the usage of ALSOK-G7 to meet customers' needs. For individual customers, the Company launched HOME ALSOK Connect, a new home security product in April 2023. In addition to the conventional Online Security Service, in which ALSOK rushes to the scene of an emergency, this product offers a less expensive Self-Security plan with optional on-site confirmation by ALSOK upon notification of an emergency. The Self-Security plan can be upgraded to Online Security plan at any time. The Group also promoted sales of HOME ALSOK MIMAMORI SUPPORT, a service to watch over senior citizens.

In Stationed Security services, we provided security services for various G7-related ministerial meetings, including the G7 Hiroshima Summit, as well as for airport facilities that have reopened following the recovery of foreign visitors to Japan. Going forward, we will work to reduce manpower and improve the efficiency of Stationed Security Services by utilizing DX, etc., and

respond to reshoring production in Japan and the post-COVID-19 resumption of domestic entertainment activities.

In Transportation Security Services, although the number of ATMs is decreasing due to the consolidation and closing of branches of financial institutions, the need to streamline cash management operations in the public and private sectors remains as strong as ever. We continue to strive to expand sales of Cash Deposit and Dispenser Machine Online System and other products. Our offerings also include Tax and Public Funds Collection System, which automates local government disbursement counter operations through the use of the Cash Deposit and Dispenser Machine Online System. In addition, as a new solution to support regional financial institutions and others in improving operational efficiency and reducing costs, we provide centralized operations of an electronic clearinghouse for bills and checks. We will continue to gain an understanding of various outsourcing needs and expand our service offerings.

For the General Property Management and Fire Protection Services segment, the net sales was ¥15,429 million (19.1% increase year on year), and operating income was ¥1,200 million (32.2% increase year on year) due to steady growth in completion in the construction work sectors. We will continue to expand Facilities Management Services based on the concept of integration of security, facilities, and construction, as we also strengthen our sustainability initiatives, including sales, installation, and maintenance of EV charging equipment.

For the Long-Term Care Services segment, the net sales was ¥12,538 million (20.2% increase year on year) due to new facilities opening, the increase in occupancy rate for existing facilities and the effect of mergers and acquisitions (M&A), etc. However, operating income was ¥326 million (15.2% decrease year on year) due to the increase in costs. In last fall, the Company entered into a collaboration agreement with NJI Co., Ltd. and Tokyo Medical and Dental University and initiated joint research related to standardization of a total care package that includes end-of-life prediction technology; avoidance, mitigation and response to emergency events in long-term care; development of related guidelines. We will continue to strengthen our management base and expand our facilities by streamlining nursing care operations through the use of AI robots and other technologies to support nursing care, while striving to expand services under the unified "ALSOK's Care" Long-Term Care Services brand.

In the Other Services, in addition to existing panel inspection services for vast solar facilities, we continue to expand services utilizing drones to inspect and examine various facilities.

The Group responds to growing needs for safety and security in society by utilizing new technologies and improving productivity, while fulfilling its responsibilities as a provider of services for the safety and security of society.

(6) Priority business and financial challenges

There have been no significant changes in the Group's priority business and financial challenges during the three months ended June 30, 2023.

(7) Research and development

Research and development cost was ¥147 million for the three months ended June 30, 2023, which was mainly related to security business.

There have been no significant changes in the Group's research and development activities during the three months ended June 30, 2023.

(8) Analysis of capital resources and liquidity

The Group's primary source of funds is the monthly fees received from customers, mainly in the security business, which is stable and predictable revenue. As the Group's expenditure plan is based on this stable source of funds, the Group believes there is little concern that it will face a shortage of funds in the predictable future. The Group also believes that it can obtain external financing stably due to this stable source of funds, the recent trend of the equity ratio and the good relationships with its key financial institutions.

The Group's primary capital needs and methods of financing are as follows:

(Working capital needs)

The working capital needs of the Group are mainly comprised of cost of sales, such as labor costs and outsourcing costs, selling, general and administrative expenses, such as personnel expenses, and cash required for deposit of sales proceeds into the customers' bank accounts through Cash Deposit and Dispenser Machine On-Line System in the Transportation Security Services.

While the cost of sales and selling, general and administrative expenses are generally paid out of its own funds as the payment occurs regularly throughout the year, the Group also uses short-term loans from financial institutions as necessary to meet the capital needs.

The Group uses both its own funds and short-term loans from financial institutions for deposit of sales proceeds into the customers' bank accounts through Cash Deposit and Dispenser Machine On-Line System. Such short-term loans are available through overdrafts and can be executed immediately based on the cash needs. The amount of sales proceeds that the Group deposits into customers' bank accounts on a certain day represents the amount of sales proceeds deposited into the Cash Deposit and Dispenser Machine by customers on the previous day, which fluctuates significantly on a daily basis. The amount of deposits increases especially on Monday or any business day after national holidays because such amount includes the amount deposited by customers into the Machine during the weekends and holidays, resulting in increasing use of short-term

loans from financial institutions.

(Investment capital needs)

The investment capital needs of the Group are mainly comprised of M&A transactions. This is generally paid out of its own funds, and the Group also uses short-term and long-term loans from financial institutions as necessary to meet the needs.

In addition, the recurring acquisition of security alarm equipment related to the electronic security is also included in capital investment. The Group considers the acquisition of security alarm equipment is similar in nature to the acquisition of inventories as a component of working capital since the amount per acquisition is small and it occurs as orders are received. As the acquisition of alarm equipment occurs regularly throughout the year, it is generally paid out of its own funds, which is similar to the working capital needs.

During the three months ended June 30, 2023, there have been no significant changes in the Group's capital investment plan, including capital expenditures which were planned at the end of the previous consolidated fiscal year as of March 31, 2023. (Management's view on future outlook of capital needs and methods of financing)

The Group has mostly used its own funds to meet the capital needs during the three months ended June 30, 2023 except for Transportation Security Services. At this point, the Group does not expect any significant change in the capital needs during the fiscal year ending March 31, 2024 and believes that its capital needs will be satisfied by its own funds.

(9) Facilities

(Plan for establishment or disposal of facilities)

During the three months ended June 30, 2023, there have been no significant changes in the plan for establishment or disposal of facilities which was under planning as of March 31, 2023. In addition, there were no newly established plans for installation, expansion, renovation, disposal or sale of significant facilities during the three months ended June 30, 2023.
